

DUKE FLUSH MOUNT COLD PAN

Shown with optional slant kit

Intuitive & colorful user interface: easy to use + helpful visual alerts

Key actions are fast; minimal touches to change function. Same controls used in other Duke appliances such as HotColdFreeze, Waterless Hot Food

Wells, Recessed HotFrost, HotFrost overshelves and Dual Tier merchandisers. Staff members need to learn just one user interface. Additionally, you will see **on-screen notifications when basic functionality is not performing per specifications** to help you stay ahead of any problems and keep your kitchen running.

Our design makes everything easier: easy to clean, refill and service

Compared to 3" recessed pans, flush mount makes it easier for staff to grab, lift and refill food pans. The flush mount also makes it easier to keep the countertop clean since there isn't a 3" recess to clean around.

The **traditional refrigeration design system is easy to service** since it doesn't incorporate fans or special fluids.

Makes food the star of the show & enhances self-service applications

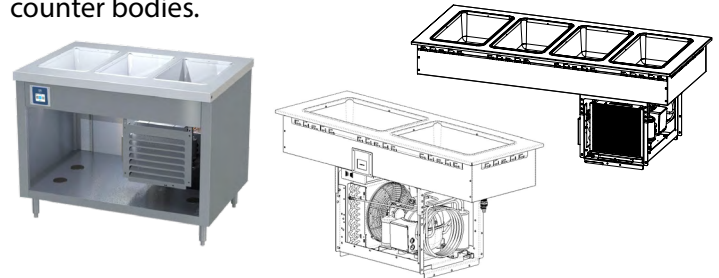

Minimal equipment visibility; unsurpassed food merchandising/display that encourages greater sales and participation.

Food is easier to see and reach thus enhancing self-service, which is growing in popularity due to labor shortages.

Multiple Configurations

A configuration for every application: standard drop-ins, slimline drop-ins, built-ins for Aeroserv and Thurmaduke counter bodies.

NSF 7 safe: food holding performance equal to, and in most cases better than, traditional cold pans
