

NEW

COLD SERVING WELLS

Duke will be introducing a *newly designed and improved R290 cold food well* beginning in November to replace the existing ADI cold pans.

The new Cold Serving Well offers a $\frac{3}{4}$ " recess, representing a significant merchandising and accessibility improvement over traditional 3" recess Cold Wells.

Key Notes

- The ADI 8" and 10" deep cold food wells will be replaced with a single 8" deep cold food well.
- The new cold food well will be available as drop-ins or built into Thurmaduke and Aeroserv counters.
- Cut outs and dimensions will remain the same.
- There will be no price changes at this time.
- AQ and KCL will be updated to coordinate with the phase in.

Attribute
